EDUCATION

Villanova University

Bachelor of Science in Computer Science, Minor in Cybersecurity

- **GPA:** 3.75 / 4.00; **Honors:** Dean's List

Villanova, PA

Expected May 2026

EXPERIENCE

Software Engineering Intern

Remote

ClassLink

June 2025 - August 2025

- Engineered a lightweight application that ingested and processed roster data for millions of student and teacher accounts, demonstrating a scalable integration model for future partners by leveraging ClassLink APIs and 3+ AWS services
- Implemented SSO authentication with OAuth2/OIDC, showcasing secure login flows with ClassLink credentials to serve as a reference for partner application development
- Authored 5+ pages of API reference documentation, setup guides, code samples, and security best practices, creating a reusable resource that reduced onboarding time for future integrations

Computer Science Tutor

Villanova, PA

Villanova University

January 2025 – Present

- Tutored 100+ undergraduate students per semester across 5+ computer science courses, improving comprehension and problem-solving skills and helping students achieve higher course grades through tailored 1-on-1 instruction
- Delivered 4+ hours of weekly sessions on data structures and algorithms in Python and Java, increasing students' coding proficiency and enabling better performance on assignments and exams

Co-Founder, Co-President

Villanova, PA

Villanova Software Engineers

October 2024 - Present

- Lead a team of 20+ software engineering students to design and deliver an application for a startup client, providing a hands-on learning experience and applying best practices in team collaboration and software development
- Collaborated with the Villanova Consulting Group to transform a startup idea into a functional prototype, mentoring team members and enhancing their technical proficiency and project experience
- Configured a GitHub organization for 20+ team members, utilizing version control and coordination to improve development workflow and accelerate project completion

PROJECTS

Stardewdle | *React, TailwindCSS, AWS Lambda, DynamoDB, Amplify*

- Launched a full-stack Wordle-style game with 1000+ daily players, where users guess from 70+ Stardew Valley crops by comparing 5 attributes across 6 attempts
- Composed 5+ modular React components using isolated state, custom hooks, and conditional rendering to manage game flow, input handling, and real-time visual feedback
- Architected a serverless backend using 5 AWS services (Lambda, API Gateway, DynamoDB, EventBridge, S3) for validating guesses, retrieving data, and triggering daily puzzle rotation

ClassLink Integration Demo | *Vite, AWS Lambda, DynamoDB, API Gateway*

- Enabled secure login for 10+ million users by integrating ClassLink SSO with OAuth 2.0 authorization code flow, providing a reusable reference implementation for future partner integrations
- Built and deployed a serverless backend using 3+ AWS services such as AWS Lambda, API Gateway, and DynamoDB, supporting scalable and authenticated data retrieval for end users
- Developed a React frontend interacting with ClassLink APIs to enforce session security, optimizing partner integration and reducing setup speeds by an estimated 50%

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Python, Java, JavaScript, Swift

Frontend Development: React, Vite, HTML/CSS, TailwindCSS, Figma

Backend Development: Node.js, DynamoDB, BeautifulSoup

Developer Tools: AWS, Postman, Vercel, Git, GitHub

Certifications: AWS Cloud Practitioner
