EDUCATION

Villanova University

Bachelor of Science in Computer Science, Minor in Cybersecurity

- **GPA:** 3.75 / 4.00; **Honors:** Dean's List

Villanova, PA

Expected May 2026

EXPERIENCE

Software Engineering Intern

ClassLink

Remote

June 2025 - August 2025

- Produced a lightweight application integrating with ClassLink's ecosystem, including ingesting and processing roster data for millions of student and teacher accounts using ClassLink's APIs and 2+ services from AWS
- Implemented SSO authentication with OAuth2/OIDC for secure user login, allowing users to log in with their ClassLink credentials
- Composed 5+ pages of API reference documentation, step-by-step setup guides, code samples, and security best practices to speed up future partner integrations

Computer Science Tutor

Villanova University

Villanova, PA

January 2025 - Present

- Provide 1-on-1 tutoring sessions to 40+ undergraduate computer science students per semester, covering 5+ distinct computer science courses
- Conduct 4+ hours of tutoring sessions weekly, helping students refine their understanding of data structures and algorithms in programming languages such as Python and Java

Co-Founder, Co-President

Villanova Software Engineers

Villanova, PA

October 2024 - Present

- Establish and lead a team of 20+ software engineering students to design and develop software solutions for startup clients
- Collaborate with the Villanova Consulting Group to transform startup ideas into tangible solutions by leveraging the technical skills of the team
- Configure the GitHub organization to centralize project collaboration, streamline version control, and facilitate seamless contributions from 20+ team members

PROJECTS

Stardewdle | *React, TailwindCSS, AWS Lambda, DynamoDB, Amplify*

- Developed and deployed a full-stack Wordle-style game with 900+ daily players, where users guess from 70+ Stardew Valley crops by comparing 5 attributes across 6 attempts
- Built 5+ modular React components using isolated state, custom hooks, and conditional rendering to manage game flow, input handling, and real-time visual feedback
- Engineered a serverless backend using 5 AWS services (Lambda, API Gateway, DynamoDB, EventBridge, S3) for validating guesses, retrieving data, and triggering daily puzzle rotation

ClassLink Integration Demonstrator | *Vite, AWS Lambda, DynamoDB, API Gateway*

- Integrated with ClassLink SSO, enabling secure login for millions of users through OAuth 2.0 authorization code flow
- Built and deployed a serverless backend using AWS Lambda, API Gateway, and DynamoDB for authenticated user data retrieval and storage
- Designed and implemented a React-based frontend that interacts with ClassLink's APIs to properly secure the user's session

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Python, Java, JavaScript, Swift

Frontend Development: React, Vite, HTML/CSS, TailwindCSS, Figma

Backend Development: Node.js, DynamoDB, BeautifulSoup

Developer Tools: AWS, Postman, Vercel, Git, GitHub

Certifications: AWS Cloud Practitioner
