EDUCATION

Villanova University

Bachelor of Science in Computer Science, Minor in Cybersecurity

- **GPA:** 3.75 / 4.00; **Honors:** Dean's List (7 Semesters)

Villanova, PA

Expected May 2026

EXPERIENCE

Software Engineering Intern

ClassLink

Remote

June 2025 - August 2025

- Reduced partner integration time by **50%** by processing **5M+** user records across **3,000+** school districts through distributed AWS data pipeline (Lambda, DynamoDB, Secrets Manager)
- Standardized secure login flows across AWS infrastructure for **10+** partner applications by implementing OAuth2/OIDC SSO authentication with industry best practices
- Decreased engineering support requests by **60%** and accelerated onboarding by enabling **5+** partner teams to integrate independently through comprehensive API documentation

Software Engineer

Villanova Institute for Research and Scholarship

Villanova, PA

January 2026 - Present

- Building React application for **50+** faculty researchers across **7** user interfaces by implementing Firebase authentication, PostgreSQL backend integration, and role-based access control
- Achieved **100%** session data persistence through disruptions by designing fail-safe timer state management with real-time synchronization and automated daily cutoffs
- Developing **4** production features (dashboard, leaderboard, messaging, admin panel) by architecting reusable component library and state management patterns for authentication and data visualization

Co-Founder, Co-President

Villanova Software Engineers

Villanova, PA

October 2024 - Present

- Established engineering organization delivering full-stack applications for startup clients with **20+** members by co-founding organization, managing cross-functional teams, and establishing development workflows
- Coordinating production release of web application supporting **1000+** users by leading React/Node.js/PostgreSQL development, coordinating Agile sprints, and guiding architecture decisions
- Accelerated team onboarding for **10+** junior developers by mentoring through code reviews and pair programming, introducing Git workflow, debugging practices, and frontend patterns

Computer Science Peer Tutor

Villanova University

Villanova, PA

January 2025 - Present

- Improved problem-solving skills and academic performance for **100+** students across **200+** sessions by tutoring in data structures, algorithms, and programming (Python/Java)
- Received nomination for Peer Tutor of the Year from pool of **100+** tutors through teaching excellence and mentorship impact across multiple CS disciplines

Competitive Programmer

Villanova Programming Team

Villanova, PA

August 2022 - Present

- Earned selection to represent Villanova at 2025 ICPC regional competition against **90+** teams by solving algorithmic problems in Python using data structures and optimization techniques
- Strengthened expertise in algorithms, complexity analysis, and competitive programming techniques by solving **300+** LeetCode/Kattis challenges through consistent practice

PROJECTS

Stardewdle | *React, TailwindCSS, AWS Lambda, DynamoDB, Amplify*

- Launched Wordle-style game achieving **140k+** plays with **99.9%** uptime supporting **1000+** concurrent users by architecting serverless backend with low latency
- Sustained sub-second response times under high concurrent load handling **1000+** daily plays by optimizing real-time state synchronization and game logic
- Achieved **<200ms** response times with automated daily puzzle generation while optimizing for AWS free tier operation by architecting serverless backend using Lambda, API Gateway, DynamoDB, S3, and EventBridge

ChessLab | *React, TypeScript, Node.js, Express, Stockfish, Chess.com API, Vercel*

- Deployed full-stack chess analysis platform streaming real-time Stockfish engine analysis in **<500ms** with **4** core features by developing React/TypeScript frontend and Express/Node.js backend on Vercel
- Dynamically generated tactical puzzles from user game blunders by integrating **2** external APIs (Chess.com, Lichess) orchestrating concurrent engine evaluation and position-based opening data
- Enabled live engine analysis streams, automated puzzle extraction, and interactive move tree navigation across full-stack architecture by designing React/TypeScript frontend and Express/Node.js backend with undo/redo functionality

TECHNICAL SKILLS & CERTIFICATIONS

Languages & Frameworks: JavaScript, TypeScript, Python, Express, React, Node.js, SQL/NoSQL, REST APIs

Cloud & DevOps: AWS (Lambda, API Gateway, DynamoDB), OAuth2/OIDC, Git, CI/CD, Agile/Scrum, Jira, Postman

Tools & Technologies: HTML, CSS3, TailwindCSS, Vercel

Certifications: AWS Certified Cloud Practitioner
