EDUCATION

Villanova University

Bachelor of Science in Computer Science, Minor in Cybersecurity

- **GPA:** 3.75 / 4.00; **Honors:** Dean's List

Villanova, PA

Expected May 2026

EXPERIENCE

Incoming Software Engineering Intern

Remote

ClassLink

Starting June 2025

- Plan to design and develop an application integrating ClassLink's platform, including ingesting and processing roster data for millions of student and teacher accounts using RESTful APIs and implementing SSO authentication with OAuth2/OIDC for secure user login
- Will construct a front-end interface using React, all supported by an AWS-based backend
- Expected to produce 10+ pages of API reference documentation, step-by-step setup guides, and security best practices to streamline future partner integrations

Computer Science Tutor

Villanova, PA

Villanova University

January 2025 - Present

- Provide 1-on-1 tutoring sessions to 40+ undergraduate computer science students per semester, covering 5+ distinct computer science courses
- Conduct 4+ hours of tutoring sessions weekly, helping students refine their understanding of data structures and algorithms in programming languages such as Python and Java

Co-Founder, Co-President

Villanova, PA

Villanova Software Engineers

October 2024 - Present

- Establish and lead a team of 20+ software engineering students to design and develop software solutions for startup clients
- Collaborate with the Villanova Consulting Group to transform startup ideas into tangible solutions by leveraging the technical skills of the team
- Configure the GitHub organization to centralize project collaboration, streamline version control, and facilitate seamless contributions from 20+ team members

PROJECTS

Stardewdle | *React, TailwindCSS, AWS Lambda, DynamoDB, Amplify*

- Developed and deployed a full-stack Wordle-style game with 400+ daily players, where users guess from 70+ Stardew Valley crops by comparing 5 attributes across 6 attempts
- Built 5+ modular React components using isolated state, custom hooks, and conditional rendering to manage game flow, input handling, and real-time visual feedback
- Enabled event-based audio using JavaScript and HTML5 Audio API to trigger feedback sounds tied to guess accuracy and puzzle completion
- Engineered a serverless backend using 5 AWS services (Lambda, API Gateway, DynamoDB, EventBridge, S3) for validating guesses, retrieving data, and triggering daily puzzle rotation

Villanova Software Engineers Website | *JavaScript, React, Firebase*

- Created and maintained a website using JavaScript, React, and Firebase to showcase the Villanova Software Engineers team's projects and information
- Integrated dynamic features and interactive UI components to enhance user engagement and improve navigation across team profiles, project descriptions, and contact pages
- Utilized Firebase for secure data storage, allowing admins to access input responses from users on the site

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Python, Java, JavaScript, Swift

Frontend Development: React, HTML/CSS, TailwindCSS, Figma

Backend Development: Node.js, DynamoDB, BeautifulSoup

Developer Tools: AWS, Postman, Vercel, Git, GitHub

Certifications: AWS Cloud Practitioner
