EDUCATION

Villanova University

Bachelor of Science in Computer Science, Minor in Cybersecurity

- **GPA:** 3.75 / 4.00; **Honors:** Dean's List (6 Semesters)

Villanova, PA

Expected May 2026

EXPERIENCE

Software Engineering Intern

ClassLink

Remote

June 2025 - August 2025

- Built distributed data pipeline processing **5M+** user records across **3,000+** school districts using AWS (Lambda, DynamoDB, Secrets Manager), reducing partner integration time by **50%**
- Implemented OAuth2/OIDC SSO authentication for **10+** partner applications, standardizing secure login flows across AWS infrastructure with industry best practices
- Created API documentation enabling **5+** partner teams to integrate independently, reducing engineering support requests by **60%** and accelerating onboarding

Software Engineer

Optima (via Villanova Software Engineers)

Villanova, PA

January 2025 - May 2025

- Led iOS development creating **10+** production views in Swift/SwiftUI, architecting UI system supporting **3000+** users with focus on performance and scalability
- Engineered reusable SwiftUI components and state-driven architecture, reducing code duplication by **40%** and improving maintainability across weekly Agile sprints
- Delivered production-ready iOS MVP to startup client in **14** weeks, coordinating frontend development, testing, and handoff through structured sprint cycles

Co-Founder, Co-President

Villanova Software Engineers

Villanova, PA

October 2024 - Present

- Co-founded **20+** member engineering organization delivering full-stack applications for startup clients, managing cross-functional teams and establishing development workflows
- Leading development of React/Node.js/PostgreSQL web application supporting **1000+** users, coordinating Agile sprints and guiding architecture decisions toward production release
- Mentored **10+** junior developers through code reviews and pair programming, introducing Git workflow, debugging practices, and frontend patterns to accelerate team onboarding

Computer Science Peer Tutor

Villanova University

Villanova, PA

January 2025 - Present

- Tutored **100+** students across **200+** sessions in data structures, algorithms, and programming (Python/Java), improving problem-solving skills and academic performance
- Nominated for Peer Tutor of the Year from pool of **100+** tutors, recognized for teaching excellence and mentorship impact across multiple CS disciplines

Competitive Programmer

Villanova Programming Team

Villanova, PA

August 2022 - Present

- Selected by faculty to represent Villanova at 2025 ICPC regional (90+ teams), solving algorithmic problems in Python using data structures and optimization techniques
- Solved **300+** LeetCode/Kattis challenges through consistent practice, strengthening expertise in algorithms, complexity analysis, and competitive programming techniques

PROJECTS

Stardewdle | React, TailwindCSS, AWS Lambda, DynamoDB, Amplify

- Launched Wordle-style game with **100k+** plays, architecting serverless backend supporting **1000+** concurrent users with **99.9%** uptime and low latency
- Optimized real-time state synchronization and game logic to handle **1000+** daily plays, maintaining sub-second response times under high concurrent load
- Architected serverless backend using AWS (Lambda, API Gateway, DynamoDB, S3, EventBridge), optimizing for free tier operation while maintaining **<200ms** response times and automated daily puzzle generation

ChessLab | React, TypeScript, Node.js, Express, Stockfish, Chess.com API, Vercel

- Developed full-stack chess analysis platform with **4** core features (game review, auto-generated puzzles, opening explorer, sandbox), deployed on Vercel with real-time Stockfish engine integration streaming analysis in **<500ms**
- Integrated **2** external APIs (Chess.com, Lichess) orchestrating concurrent engine evaluation and position-based opening data, dynamically generating tactical puzzles from user game blunders
- Designed React/TypeScript frontend and Express/Node.js backend handling live engine analysis streams, automated puzzle extraction algorithm, and interactive move tree navigation with undo/redo

TECHNICAL SKILLS & CERTIFICATIONS

Languages & Frameworks: JavaScript, TypeScript, Python, Swift, Java, React, Node.js, SwiftUI, SQL/NoSQL, REST APIs

Cloud & DevOps: AWS (Lambda, API Gateway, DynamoDB), Git/GitHub, CI/CD, Agile/Scrum, Jira, Postman

Tools & Technologies: HTML, CSS3, TailwindCSS, Figma, Vercel, Xcode, Performance Optimization, Testing

Certifications: AWS Certified Cloud Practitioner
